

28 rock drill installation

Which lubricator is used in Rock Drill yt28?

The Rock Drill is equipped with lubricator FY200C. Secoroc YT28 is intended to be used together with pusher leg FT160BC and FT160BD for different tunneling and work conditions. It is also designed for dry drilling or wet drilling mounted on rigs. Specification Pneumatic rock drill YT28

What makes hrd28x a good rock drill?

Using standard integral drill steel with air-flushing from an external compressor and a high-performing hydraulic impact and rotation unit makes the HRD28X a lighter, more powerful, and more efficient rock drill.

How deep is a secoroc yt28 hole?

Secoroc YT28 is suitable for both horizontal and upward anchor holes in medium- hard and hard rocks ($f=8-18$). The hole diameter range is from 32 mm to 42 mm with depths up to 5 meters. The Rock Drill is equipped with lubricator FY200C.

How do you operate a rock drill?

To effectively operate a rock drill, follow these steps: Ensure Proper Personal Protective Equipment (PPE): Prior to starting, put on appropriate PPE, including safety glasses, ear protection, and steel-toed boots. Mark Hole Locations: Clearly mark the locations where you intend to drill holes on the surface.

How deep can a Hycon drill drill be used?

Recommended for up to 6 m depth/34 mm drilling in granite (depending on the compressor). Consult one of our salespersons for recommendations for deeper drilling. HYCON handheld hydraulic rock drill HRD28X designed for the toughest drilling applications in granite and concrete.

What is a rock drill?

Rock drilling refers to a tool that combines hammering and rotational movement, akin to a jackhammer. It's primarily employed on concrete and similar surfaces. Its design is geared towards breaking down and subsequently removing the affected area, rather than cutting. A rock drill comprises three main components: the body, shaft, and bit.

To help the drill bit cut through soil and rock, the contractor pumps drilling fluid through the drill pipe string. The fluid exits the drill string through jet nozzles in the bit, lubricating and cooling it. ...

The Normet SDA system may be used for different rock conditions, and drill bits are available in different designs and diameters. The thread types are compatible to international standards ...

YT28 Air Leg Rock Drills The YT28 air leg rock drills is used to drill horizontal and inclined blast holes in medium-hard rock with a hardness of $f=8-18$. It may also be for making roof bolting ...
