

## Guide rail rock

What type of guide rail should be used?

Type 31-SCguide rail should be used. Add a rubrail or Double nest the rail or Bolt a W-beam to back of the posts Curb must be flush with the face of guide rail. Generally,a line of utility guide rail should not be used to shield poles or trees. Where due to other guide obstructions,is used in front of Deflection poles or trees on page 18.

What is a guide rail and carriage?

Guide rails and carriages,as mentioned in the passage,are designed specifically for use on horizontal surfaces. The contact angle of the ball bearings on the rail allows these carriages to last longer than other carriages. Made of stainless steel,these guide rails and carriagesare more corrosion resistant than steel carriages and guide rails.

What is a guiderail bike rack?

The GuideRail steps away from the traditional carrying style of platform hitch racks;By utilizing dual load arms,the rack completely eliminates frame or fork contact,it allows for asymmetric bike loading to avoid handlebar interference,and it creates a simple aesthetic that virtually blends in with most vehicles.
