

High precision down-the-hole drilling rig video

What is a down the hole drilling rig?

Down the hole drilling rig is an impact rotary drilling rig. Its internal structure is different from that of a general rock drill.

Who makes the best DTH drill rig?

Unite Machinery is a reputable name in construction and mining equipment, has the most advanced DTH equipment specifically designed for demanding environments in which accuracy and dependability are a must.

Why Choose a DTH Drill Rig?

What is a DTH drilling rig?

DTH drilling rigs can be utilized in a range of operations, such as mining as well as infrastructure projects drilling for oil and gas exploration as well as the drilling of water wells.

Why do you need a down-the-hole drill machine?

A good equipment will not just do the job, it does better, quicker and at a lower cost. In the case of drilling through hard rocks it is this Down-the-Hole (DTH) drill machine that has established itself as a reliable workhorse in the industry.

Which drill machine is best for drilling through hard rocks?

In the case of drilling through hard rocks it is this Down-the-Hole (DTH) drill machine that has established itself as a reliable workhorse in the industry. Its advanced technology offers an incredibly powerful mix of penetration force and directional accuracy which makes it an ideal choice in projects where conventional top-hammer techniques fail.

What is DTH hammer deep-hole drilling?

Against this backdrop, large-diameter DTH hammer deep-hole drilling technology has emerged as a game-changer, offering unique advantages and quickly gaining recognition in the mining industry. This technology significantly improves drilling efficiency, reduces costs, and provides robust technical support for sustainable resource development.

Integrated Down The Hole Drill Rig (DTH Drill Rig) comes into being as the requirements for efficiency and intelligence in mining, foundation engineering ...

The down-the-hole drilling rig uses the impactor and the DTH drill bits submerged into the bottom of the hole to impact and crush the rock. Therefore, it is called ...
