

Video explanation of replacing the clamp sleeve of a

How do you use a band sleeve clamp?

Band sleeve clamps offer a reliable solution for exhaust pipe connections. Begin by sliding the clamp over one end of the pipes to be joined. Once in place, tighten the clamp evenly. This creates a strong, leak-proof seal without damaging the pipes. Exhaust sleeve clamp technology is particularly useful for its versatility and strength.

How do you use an exhaust sleeve clamp?

Begin by sliding the clamp over one end of the pipes to be joined. Once in place, tighten the clamp evenly. This creates a strong, leak-proof seal without damaging the pipes. Exhaust sleeve clamp technology is particularly useful for its versatility and strength. It's a great choice for various pipe diameters and types.

Can a plidco clamp & sleeve be used near a pipe repair?

Do not exceed the design pressure of the PLIDCO Clamp+Sleeve. Personnel should not be allowed near the repair until the seal has been proven. Remove all coatings, rust and scale from the pipe surface where the circumferential seals and clamping sections of the PLIDCO Clamp +Sleeve will contact the pipe.

What is exhaust sleeve clamp technology?

Exhaust sleeve clamp technology is particularly useful for its versatility and strength. It's a great choice for various pipe diameters and types. The main advantage of band sleeve clamps is their ability to provide a secure connection without the need for welding or extensive modifications.

How do I assemble a plidco clamp & sleeve?

Assemble the PLIDCO Clamp+Sleeve around the pipemaking sure the yellow painted ends are matched and that the fitting is centered over the leak and/or damaged area as much as possible. Sometimes it is helpful to loosely assemble the Plidco Clamp+Sleeve to one side of the leak, than reposition it centered over the leak.

Why do I need a different length plidco clamp+sleeve?

Badly out-of-round pipemay require a different length PLIDCO Clamp+Sleeve to ensure the circumferential seal are positioned on round pipe. A PLIDCO Clamp+Sleeve is not capable of reshaping flatten or dented pipe. PLIDCO manufactures an Ovality Gauge that can measure the cross sectional shape of the pipe.

Sorry about the blurry video. The camera had trouble focusing. I had a budget to rebuild this engine and then stuff happens. The machine shop quoted me a ver...
